Coding Debug Log

College | Computer science and data | All levels

Name: _____ Date: _____

Change one thing at a time. Record evidence so you can distinguish the cause from a coincidence.

EXPECTED VS. ACTUAL

Expected behavior:
Actual behavior or exact error:

MINIMUM REPRODUCTION

Smallest input, code path, or dataset that still shows the problem:

HYPOTHESIS

I think the cause may be _____ because _____.

TEST + RESULT

One controlled change:
Result and evidence:

FIX + PREVENTION

Final fix, test added, and what will prevent regression:
