Research Article Analyzer

College | Psychology, social science, health, education, and communication

Name: _____ Date: _____

Summarize the study accurately before evaluating it. Distinguish the authors' evidence from your own interpretation.

RESEARCH QUESTION

What question or hypothesis is being tested?

METHOD

Participants or data | Design | Measures | Comparison

KEY RESULT

State the result without overstating causation. Include the most important statistic if reported.

LIMITATIONS

Sampling, measurement, confounds, generalizability, or alternative explanations:

APPLICATION + NEXT STUDY

What can we reasonably use this finding for? What should researchers test next?
