Main Idea and Supporting Details

Grades 5-6 | Informational reading | Developing

Learner: _____ Date: _____

Read each original mini-passage. State the main idea and name the detail that supports it most directly.

Bees move pollen between flowers while collecting food. This helps many plants make seeds and fruit.

Answer: _____

A wetland absorbs extra rainwater. Its plants also provide shelter for fish, birds, and insects.

Answer: _____

Musicians repeat difficult sections slowly before returning to full speed. This builds accuracy.

Answer: _____

Libraries lend books, provide technology, and host community programs.

Answer: _____

Grown-up check: Bees help plants reproduce; wetlands manage water and support habitats; slow focused practice improves accuracy; libraries provide multiple community resources.
