Photosynthesis: Sequence and Summarize

Grade 5 | Plant science | Process reading | Color

Learner: _____ Date: _____

Use this simplified model: roots take in water; leaves take in carbon dioxide; chlorophyll captures light; the plant makes sugar and releases oxygen. Sequence and summarize.

TRY IT

Complete all six prompts. You may write, point, explain aloud, or use a scribe.

1 ____ **Chlorophyll captures light.**

_____

2 ____ **Roots take in water.**

_____

3 ____ **Plant makes sugar.**

_____

4 ____ **Leaves take in carbon dioxide.**

_____

5 ____ **Oxygen is released.**

_____

6 **Write a one-sentence summary:**

_____

_____

Grown-up check: Order by listed rows: 3, 1, 4, 2, 5. Summary mentions light, water, carbon dioxide, sugar, and/or oxygen without requiring all five terms.
