What Happens to Water on a Leaf?

Kindergarten-Grade 2 | Life science | Adult-guided observation | Ink-Saver B&W

Learner: _____ Date: _____

A grown-up places one drop of water on a clean leaf. Look from the side without tasting. Compare a smooth waxy leaf and a soft fuzzy leaf if available.

1 **CHOOSE A SAFE LEAF**

2 **PLACE IT ON A TRAY**

3 **ADD ONE WATER DROP**

4 **LOOK FROM THE SIDE**

5 **TILT THE LEAF GENTLY**

6 **DRAW WHAT YOU NOTICE**

Grown-up check: Water often beads and rolls on a smooth waxy leaf but may spread or cling on a fuzzy leaf. Results vary by leaf surface. Use only known non-toxic leaves, do not taste, and wash hands after observing.
